Subject: North Main Street Bridge

Todd,

On January 16, 2015, the Engineering Division was granted an Inland Wetlands and Watercourses permit (Application No. 1020) for the rehabilitation of the North Main Street Bridge. Unfortunately, this construction project has not yet started. We recently received a construction grant through the State's Local Bridge Program. With this additional funding, we hope to start construction in the Spring of 2017 with construction completion anticipated by October 2018. As such, I request an extension of the existing Inland Wetlands and Watercourses permit.

Please let me know if you need anything further.

Thank you,

Duane J. Martin, P.E.

Town Engineer
